SUBJECT GUIDE TO RECORDS

IN THE

MASSACHUSETTS ARCHIVES

September 1992

COLLECTION
1993

THE MASSACHUSETTS ARCHIVES
AT COLUMBIA POINT
A DIVISION OF THE
OFFICE OF THE MASSACHUSETTS SECRETARY OF STATE
MICHAEL J. CONNOLLY, SECRETARY

SCOPE

This finding aid, a subject guide to the holdings of the Massachusetts Archives, consists of an alphabetical index to listings of 1300 series of permanent state records, derived from descriptions entered in the Research Libraries Information Network (RLIN), a national bibliographic database. Not included are another 400 series still being described; the contents of the so-called Massachusetts Archives series--328 volumes of records, 1603-1799; and other materials, largely pension and other early Treasury records, not yet identified or numbered as discrete series. Also excluded are series still held in their entirety by state agencies and those held by county and municipal agencies.

INDEX TERMS

Topical and geographic subject headings, mostly taken from Library of Congress Subject Headings, are arranged in strict alphabetical sequence, with punctuation indicating subdivisions ignored in filing. It should be emphasized that such headings constitute only one way of gaining subject-oriented access to archival materials. Moreover, the headings: Massachusetts--Politics and government--[chronological subdivision] routinely assigned to all series descriptions have been omitted here. This means that military records, indexed in RLIN under, e.g.: Massachusetts--Politics and government--Civil War, 1861-1865, will be represented here only by additional assigned headings such as: Massachusetts--History, Military; Massachusetts--Militia; or: United States--History--Civil War, 1861-1865. Some general series such as the proceedings of the Massachusetts Bay Company, indexed in RLIN only under: Massachusetts--Politics and government--Colonial period, ca. 1600-1775, will not be represented here at all. Other such series include the proceedings of the Provincial Congress, Council legislative records, House and Senate journals, and gubernatorial general subject and correspondence files. A list of the subject headings that are used in the guide is prefixed to it.

ENTRY CONTENTS

Entries under a given subject heading are filed alphabetically by creating state agency (author), which is followed in each case by series title and span dates; RLIN ID number--to be used in retrieving a full series description from RLIN at the Archives or elsewhere; the Archives series number (those followed by: X represent closed series, others being open to future accessions); and agency code--by which agencies are identified at the Archives and which can be searched in the Archives shelflist for additional related materials. Entries under a given creating agency are generally, though not always, filed alphabetically by series title.

It would be highly unlikely for a compilation such as this to be error-free, especially since at least half the entries are derived from RLIN records not yet even proofread since input. An effort has been made to correct input errors in subject access points themselves, but inevitably there are some inconsistencies and evidences of policy changes over time in choice and form of headings assigned.
